Computer Engineering Graduate | UX Research | UX/UI Design | Available to Start Immediately
Bangkok, Thailand

Computer Engineering graduate from Sirindhorn International Institute of Technology (SIIT), Thammasat University, with experience in UX Research, UX/UI Design, Frontend Development, and Data Analysis. Experienced in conducting usability testing, analyzing large-scale user feedback, and translating research findings into actionable product improvements within a leading digital banking environment. Strong foundation in user-centered design, React.js, Next.js, Figma, and data-driven decision making. Proven ability to collaborate effectively with product, design, and business stakeholders in agile environments.

Skills & Proficiencies

UX Research Methods: Usability Testing, Single Ease Question (SEQ), Severity Classification, Guerrilla Testing

UI/UX Design: Figma (Wireframing, Prototyping, User Flows)

Frontend Development: React.js, Next.js, Tailwind CSS, HTML, CSS, JavaScript, TypeScript

Data & Analytics: Python, SQL, Google Analytics, Selenium (data scraping)

Other Tools: Jira, Git, Excel, PowerPoint, Microsoft Teams

Experience

TMBThanachart Bank (ttb) – UX Research Intern

January 2026 – May 2026

- Conducted usability testing across 12 digital banking projects covering primary banking, investment, lending, wealth management, customer service, and insurance products.
- Applied UX research methodologies including Usability Testing, SEQ, Severity Classification, and Guerrilla Testing.
- Prepared UX reports and transformed research findings into actionable recommendations for product and design teams.
- Presented usability insights to stakeholders and supported data-driven product decisions.
- Analyzed user behavior, usability findings, and approximately 8,000 monthly in-app feedback comments to identify user pain points and improvement opportunities.

Tohome.com – Web Developer Intern

June 2025 – July 2025

- Developed and optimized features for the e-commerce platform using Next.js, improving load speed and responsiveness.
- Enhanced UI/UX through cross-device testing and modern interface refinements.
- Automated supplier product integration with Python (Selenium), reducing manual update workload.
- Implemented Google Analytics to track user behavior, generating insights that supported product placement and marketing strategies.
- Conducted product data analysis to identify trending items, and created promotional content that increased engagement.

Research Assistant (Medical Imaging AI)

August 2024 – December 2025

Senior Project under Dr. Pakinee Aimmanee

- Researched deep learning architectures and evaluated their suitability for CNV detection and segmentation.
- Annotated CNV regions for ground truth and contributed to model selection.
- Co-authored the published paper: “Automated Detection and Segmentation of Choroidal Neovascularization in OCT Using Deep Learning,” *Science & Technology Asia*.

Database Lab Project – UX/UI Designer & Frontend Developer

August 2024 – December 2024

- Designed and developed a management web application, leading UI/UX design, user flow creation, interactive prototyping in Figma, and frontend implementation.

Human-Computer Interaction Course Project – UX/UI Designer

January 2024 – May 2024

- Designed the SIIT Super App and faculty website interface, creating user flows, wireframes, and interactive prototypes to improve usability and navigation.

Visual Acuity – Sinno Club Project

February 2024 – October 2024

- Developed an automated eyesight testing system by integrating speech recognition and image processing on Raspberry Pi 5 to support healthcare workflow efficiency.

Education

Sirindhorn International Institute of Technology, Thammasat University

[Pathum Thani], [Thailand]

Bachelor of Engineering in Computer Engineering

Graduated: May 2026

GPA: 3.18

Relevant Coursework: Human-Computer Interface Design, Software Engineering, System Analysis and Design, Artificial Intelligence, Machine Learning

Activities & Awards

- Good Conduct Student Award (Academic Year 2025), Sirindhorn International Institute of Technology
- Outstanding Student with Good Conduct (2025), Thammasat University Wai Kru Ceremony
- Vice President of Event, SCAMbled Cracking the Scam (2024–2025) | President of Event, CPE First Meet 2024
- Co-organizer, SIIT Insight Camp 2024, SIIT Games 2024 & Leadership Camp 2023
- Participant, International PBL Competition (Taipei Tech, 2023) — *Merit Award*
- President, Computer Engineering Batch 31 | Sub Student Committee, SIIT (2023)
